

GRI standards table

GRI Content Index

The Global Reporting Initiative (GRI) is an institution aimed at developing and disseminating globally applicable guidelines for sustainability reporting. In accordance with GRI, companies report on the principles and indicators they apply to their economic, environmental and social commitments and render them measurable.

Information about the GRI Content Index is made available to investors and analysts on our website deka.de/deka-group/our-responsibility/how-we-practice-sustainability/sustainability-reports-and-ratings. The Content Index is an overview of all reported GRI indicators and includes references to DekaBank's respective publications, where the relevant information is provided. In addition, the GRI Content Index comprises an annual presentation of the progress made in respect of the UN Global Compact principles.

The GRI Content Index indicates where (reference) and in which publications DekaBank provides the standard disclosures under the current GRI Guidelines (standards) and the supplementary disclosures for financial service providers (Financial Services Sector Supplement – FSSS).
